

DYNOMAX® RACE SERIES MUFFLERS

- Straight-through design for maximum exhaust flow and power.
- 100% welded construction for maximum durability.
- 100% aluminized materials for long life.
- CRF (Continuous Roving Fiberglass) technology for maximum sound control.
- Flow any direction (unless stated).

Collector Muffler

- Meets NHRA sound requirement (95 dbA) on most applications under 500 CID.
- Among the lightest race mufflers on the market (7-8 lbs).
- Compact size — these mufflers fit where others won't.
- Exclusive sound directors for optimum sound attenuation.
- Includes weld-on mounting tabs for easy installation.
- OD outlet bushing allows for easy installation of rain cap or turn-down elbow.

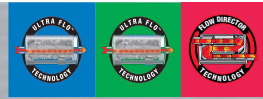

Bullet Mufflers

- Compact, round design for tight ground clearance.
- Lightweight construction.
- Maximum flow, minimum sound control.
- 2-4 dbA reduction compared to straight pipe.
- The ultimate race muffler
