Dumps

Manufactured using type 409 stainless steel. The DynoMax® Dumps feature I.D. sized inlets and outlets allowing for easy slip-fit installation with no welding required. They are perfect for the DIY'er! The outlet block-off plate is a loose flange for improved clearance and fit. High quality extended length bolts are combined with hex nuts or wing nuts for ease of use.

DynoMax[®] has taken the guesswork out of fabricating and converting a heavy-duty truck exhaust system.

The DynoMax[®] Truck Staxx kit enables light-truck owners to convert their existing exhaust outlet using two upright stacks located behind the passenger compartment. Available with either a 4" straight or angled outlet.

Each DynoMax[®] Truck Staxx kit includes stacks reducers, elbows and hardware for a complete installation. A 4" splitter tee is available separately to adapt dual stacks to single exhaust applications. Rain caps are available separately for straight stacks.
